4. A camera for coupling with an objective lens, comprising:

a prism for being disposed between the objective lens and an image plane, said prism generating aberrations; and

a corrector optic for being disposed between the objective lens and the prism, said corrector optic comprising at least two lenses for compensating spherical and coma aberrations generated by the prism.

5. The camera of Claim 4, wherein the at least two lenses comprise:

a positive lens for being disposed between the objective lens and the prism and having a convex surface for being disposed toward the objective lens; and

a negative lens for being disposed between the positive lens and the prism and having a concave surface for being disposed toward the prism.
